

**Minor subject's confirmation statement
of the reception of certificates**

For electronic certificates issued under the intermediate certificate of Auðkenni

By my signature here below I the undersigned agree to the reception of a smart card in which the electronic certificates have been filed and I have familiarized myself with and I shall abide by the terms of procedures and use of certificates and connected private keys laid down in a subscription agreement which <name-guardian> signs on my behalf due to an application for these certificates.

A guardian has confirmed that all information in the electronic certificates are correct and that the public identification which I provide is authentic and was valid upon reception of the electronic certificates.

I confirm that I have received a part of PUK and selected for myself a PKI PIN which is difficult for outsiders to connect with my person. I am aware that:

- It is impermissible to hand the electronic certificates or the PKI PIN over to others.
- It is impermissible to inform others of the PKI PIN for the electronic certificates.
- It is impermissible to store information about the PKI PIN in the same place as the electronic certificates.
- Should I document the PKI PIN I am not permitted to express that it is a code number regarding electronic certificates.
- If I have any reason to suspect that the electronic certificates have in any way been misused or that the safety of my private key or the PKI PIN could have been jeopardized during the validity of the certificates I shall immediately request Auðkenni to revoke the electronic certificates.
- Use of the certificates is considered an agreement of the information revealed therein.

I have been presented with the terms of the subscription agreement by a guardian with regards to the subject and concerning the protection of privacy and the processing of personal data.
